Figure 2. Comparison of Maximum Data Rates of Various Hard Disk Drive Interfaces. 7
Figure 3. Estimates of External Storage Devices Sold Annually (2007, Coughlin Associates) ................................................................. 8
Figure 4. Comparison of internal parallel ATA connector with a SATA connector. ....... 9
Figure 5. Percentage Breakdown of Responses to the Question: “Have you heard about e-SATA, an external interface using SATA architecture?” ........................................ 13
Figure 6. Percentage Breakdown of Responses to the Question: “How much more would you be willing to pay for such a docking station?” ........................................ 15
Figure 7. Percentage Breakdown of Responses to the Question: “How much more would you be willing to pay for such a docking station?” ........................................ 16
Figure 8. Percentage Breakdown of Responses to the Question: “How much more would you be willing to pay for a computer that had both a USB and e-SATA interface?” .......................................................... 17
Figure 9. Percentage Breakdown of Responses to the Question: “How many external storage devices will you need in the next 5 years?” ................................. 18
Figure 10. Percentage Breakdown of Responses to the Question: “How much data do you expect to create in a year averaged over the next 5 years?” ......................... 19
Figure 11. Percentage Breakdown of Responses to the Question: “How much more would you pay for an e-SATA interface external storage device offering faster transfer rates and cascading than for a USB 2.0 or IEEE 1394 interface device?” ...................... 19
Figure 12. Percentage breakdown of responses to the question: “How much more would you pay for a DVR or STB with DVR capability that wouldn’t lose data if a hard drive failed?” ........................................................................ 21
Figure 13. Use of a Port Multiplier with a “Port Multiplier Aware” Motherboard to Connect Multiple Disk Drives to a Single SATA Host Connection in a “star” topology 23
Figure 14. Use of Port Multiplication for Storage Capacity Expansion by Adding a Chain of External Storage Devices ......................................................... 24
Figure 15. Use of a Virtualization Engine in a Port Multiplier to Make two Attached HDDs look like a Single HDD to the Host. .................................................................24
Figure 16. Illustration of Three Virtualization Modes. ..............................................25
Figure 17. Showing how two disk drives behind the port multiplier can be turned into one virtual FAST mode disk drive and one SAFE mode disk drive.................................27
Figure 18. Dual port eSATA chip being used to lock an internal and external disk drive...................................................................................................................27

Tom Coughlin, President, Coughlin Associates has been working for over 25 years in the data storage industry. He has over 50 publications and six patents to his credit. Tom is active with IDEMA, the IEEE Magnetics Society, the IEEE CE Society, and other professional organizations. Tom is Chairman of the 2007 Santa Clara Valley IEEE Section. He is the founder and organizer of the Annual Storage Visions Conference, a partner to the annual Consumer Electronics Show. Coughlin Associates provides market and technology analysis as well as Data Storage Technical Consulting services. Publications include an annual report on data storage for consumer electronics and another on digital storage for entertainment creation and distribution. He also publishes a quarterly newsletter (The Data Storage Technology Newsletter) For more information go to www.tomcoughlin.com
